Professional Summary

Frontend Developer with 4+ years of experience building intuitive, high-performance web applications. Specialized in the React ecosystem (React, JavaScript, TypeScript, Node.js), with a strong focus on scalable, maintainable UI architecture. Experienced across the full frontend stack, working closely with backend teams to integrate APIs and collaborating with UX designers to deliver accessible, user-centered interfaces. Passionate about clean code, performance optimization, and continuous learning, with a holistic approach that balances technical excellence and user experience.

Technical Skills

Frontend: React, Redux, JavaScript, TypeScript, HTML5, CSS3, SASS, Next.js, SSR (Server-Side Rendering), Micro-frontends

Backend: Node.js, Express, Go, Java

Testing: Jest, React Testing Library

Databases: MySQL, MongoDB, SQL Server

DevOps & Tools: Jenkins (CI/CD), Git, DataDog, New Relic

Analytics & BI: Tableau, Looker

Architecture: Microservices, RESTful APIs, Design Systems, Atomic Design, BEM Methodology

Methodologies: Agile, SCRUM

Professional Experience

Mercado Libre

Software Engineer | March 2023 – December 2024

- Promoted to Software Engineer, recognizing significant growth in technical skills, architectural design, and cross-functional collaboration with Product and UX teams
- Led architectural discussions and participated in strategic technical design decisions for seller-facing tools within Mercado Shops Supply Flow – Traffic branch
- Designed and implemented BI dashboards using Tableau and Looker to measure tool engagement, user behavior, and feature adoption, providing actionable insights for product decisions and business strategy
- Managed infrastructure monitoring and incident response during guard duty rotations, using DataDog and New Relic to trace performance metrics, make critical decisions on traffic management and service availability, and coordinate with cross-functional teams to resolve production issues
- Drove continuous improvement initiatives by applying technical and product metrics to validate feature effectiveness and optimize performance
- Expanded responsibilities in architectural planning and strategic decision-making for the Supply Flow – Traffic branch

Software Development Analyst | May 2021 – March 2023

- Developed and maintained web applications enabling thousands of sellers to sync their Mercado Libre catalogs with third-party platforms (Meta: Facebook, Instagram; TikTok) for product promotion
- Built micro-frontends using SSR with an internal React-based headless CMS framework, ensuring optimal performance and SEO
- Implemented and maintained microservices architecture using React, TypeScript, Node.js, with backend contributions in Go and Java

- Managed CI/CD pipelines through Jenkins, ensuring automated testing and seamless deployments
- Mentored two senior-level engineers as their onboarding buddy, guiding them through the tech stack, internal platforms, workflows, and company culture—a key factor in promotion recognition
- Collaborated within a 6-person engineering team (frontend and backend) to deliver high-quality features following agile methodologies
- Maintained comprehensive test coverage using Jest and React Testing Library, ensuring code quality and reliability
- Participated in code reviews and architectural discussions, contributing to design system implementation and best practices

Seico Technology

Frontend Developer | May 2020 – August 2020

- Contributed to the redesign and refactoring of the QualyFlight application as part of the frontend team
- Created a comprehensive Design System leveraging SCSS, based on BEM and Atomic Design methodologies to ensure consistency and scalability
- Refactored legacy frontend code implementing modern best practices and improving code maintainability
- Worked in an Agile/SCRUM environment using GitLab for version control and collaboration
- **Tech Stack:** Angular, SCSS, HTML5

Technical Support Engineer | July 2015 – July 2020

- Provided technical support for Icarus Plus and AirBalance applications
- Performed SQL Server and Excel data analysis for issue resolution and quality control
- Conducted software implementations, training sessions, and product demonstrations for clients

Education & Training

Platzi Master Program | January 2020 – April 2020

Software development intensive training program with over 500 hours of study covering Git & GitHub, JavaScript, Node.js, React, MySQL, HTML5, CSS3, NPM, ES6+, and Unit Testing (Jest)

Platzi: JavaScript School | August 2019 – November 2019

Full-stack software development program specialized in MERN stack (MongoDB, Express, React, Node.js) with 36 hours of hands-on training

Additional Courses: Completed multiple advanced programming courses through Platzi

Key Achievements

- Promoted from Frontend Developer to Software Engineer at Mercado Libre within 2 years based on technical excellence and leadership
- Mentored senior-level engineers during onboarding, recognized as a key factor in promotion
- Built seller tools used by thousands of Mercado Libre merchants across Latin America
- Managed critical production incidents during guard duty, coordinating cross-team responses and infrastructure decisions
- Implemented BI analytics dashboards providing data-driven insights for product strategy
